THESIS PROJECT

Title: Covid 19 detection from chest X ray through deep learning.

Description: Detecting COVID-19 infection that is automatic, reliable, and accurate would be advantageous for rapid detection and limiting medical or healthcare professional exposure to the virus. Convolutional Neural Networks (CNNs) have been proven to be effective in the classification of medical images. In this study, a CNN is used to suggest an autonomous deep learning classification strategy for detecting COVID-19 from chest X-ray pictures.

MY WORK

- I have some project which I uploaded at GitHub. Here is my GitHub profile link below...
